10-3 REDUCTION
Sample file of why a reduction has taken place

File Information for Joe Golfer:

10-2 Index = **17.3**

1. **9.9**   2. **10.8**   3. 11.4   4.   5.   6.

Step 1   Determine whether 2 T-Scores are 3 or more strokes less than the 10-2 index of 17.3. We find that Joe does have 2 T - Scores that beat his 10-2 index by at least 3.0.

Step 2   Average T-Scores #1 and #2:

$$\begin{array}{r} 9.9 \\ + \quad 10.8 \\ \hline 20.7 \text{ divided by } 2 = 10.35 \end{array}$$

Step 3   Subtract the result of Step 2 (10.35) from 10-2 Index (17.3):

$$\begin{array}{r} 17.3 \\ - \quad 10.35 \\ \hline 6.95 \text{ rounded to } 7.0 \end{array}$$

Step 4   Refer to the Handicap Reduction Table to determine the value to be used. According to the table, the result of Step 3 (7.0) and the total number of T-Scores shot over the past 12 months (3) give Joe a value of **5.0**.

Step 5   Subtract the value derived from the table (5.0) from the 10-2 index (17.3) to determine Joe's index for the month:

$$\begin{array}{r} 17.3 \\ - \quad 5.0 \\ \hline \mathbf{12.3R} \end{array}$$
