

# Be SMART Online

Stay safe online with these 5 smart rules  
when using the internet.

S

**SAFE**

Stay safe by never giving out personal information to strangers you meet online. This includes your real name, address, phone number, photos or school name. Use a secure password for your online account and keep it to yourself.

M

**MEETING**

Never attempt to meet someone you've only met online in person unless your parent is aware and with you. Only chat and video chat with people that you and your parent know.

A

**ACCEPTING**

Never join a chat or accept a video request from someone you don't actually know. Don't accept friend requests from people you don't know or trust.

R

**RELIABLE**

Information you find on the internet may not be true, or someone online may be lying about who they are. Do not download or install something without your parent's permission.

T

**TELL**

Tell your parents if something or someone online makes you feel uncomfortable, says something inappropriate, or is bullying you or someone you know. It is always better to ask an adult to help you fix an online issue together, so that it won't happen again.
